### **DETAILED ACTION**

The following action is in response to communications filed for application 10/635,573 on October 8, 2004.

#### ***Election/Restrictions***

Claims 3, 6, 11, and 14 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on October 8, 2004.

Applicants arguments have been considered, however, the present application comprises of multiple species which would be burdensome to search for all of them. Thereby, the election/restriction is considered appropriate.

#### ***Drawings***

The drawings are objected to because In Figure 4, the label of "electromagnetic valve" beside part "96" should be removed; In Figure 6, part "92" should be labeled --fifth electromagnetic valve-- and part 90 should be relabeled --fourth electromagnetic valve--. Applicant should make sure the specification matches the drawings. Also, if different changes should be made instead of the ones suggested by the examiner, please explain.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure

Art Unit: 3681

must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2, 5, 7, 9-10, 13 and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Morita. With regard to claims 1, 5, 9, and 13, Morita teaches a hydraulic pressure control apparatus for an automatic transmission for a vehicle, comprising: a plurality of hydraulic friction engaging devices (C1, etc.); a plurality of electromagnetic control valve devices (SLC1, etc.); a driving state switching valve 53, a hydraulic pump 51; a switching valve 57; a first predetermined speed R, and a second predetermined speed 3rd (page 12). With regard to claims 2; 7, 10, and 15, Morita teaches the apparatus, wherein the switching valve is switched from the

Art Unit: 3681

first position to the second position when hydraulic pressure for driving the vehicle forward stops being output due to a change in the position of the driving state switching valve (page 12).

Claims 1, 5, 9, and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Suzuki. With regard to claims 1, 5, 9, and 13, Suzuki teaches a hydraulic pressure control apparatus for an automatic transmission for a vehicle, comprising: a plurality of hydraulic friction engaging devices (K1, etc.); a plurality of electromagnetic control valve devices (SA, etc.); a driving state switching valve 20, a hydraulic pump 10; a switching valve 30; a first predetermined speed 1st, and a second predetermined speed 5th (Col. 13).

#### ***Allowable Subject Matter***

Claims 4, 8, 12, and 16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Yasuda, Jang, Kim, Takahashi, Itou '165 and '991 have been cited to show similar transmission controls.

#### **FACSIMILE TRANSMISSION**

Submission of your response by facsimile transmission is encouraged. Group 3600's facsimile number is (703) 305-3597. Recognizing the fact that reducing cycle time in the processing and examination of patent applications will effectively increase a patent's term, it is to your benefit to submit responses by facsimile transmission whenever permissible. Such submission will place

Art Unit: 3681

the response directly in our examining group's hands and will eliminate Post Office processing and delivery time as well as the PTO's mail room processing and delivery time. For a complete list of correspondence not permitted by facsimile transmission, see MPEP 502.01. In general, most responses and/or amendments not requiring a fee, as well as those requiring a fee but charging such fee to a deposit account, can be submitted by facsimile transmission. Responses requiring a fee which applicant is paying by check should not be submitting by facsimile transmission separately from the check.

Responses submitted by facsimile transmission should include a Certificate of Transmission (MPEP 512). The following is an example of the format the certification might take:

I hereby certify that this correspondence is being facsimile transmitted to the Patent and Trademark Office (Fax No. (703) 305-3597) on \_\_\_\_\_ (Date)

Typed or printed name of person signing this certificate:

\_\_\_\_\_  
\_\_\_\_\_

(Signature)

If your response is submitted by facsimile transmission, you are hereby reminded that the original should be retained as evidence of authenticity (37 CFR 1.4 and MPEP 502.02). Please do not separately mail the original or another copy unless required by the Patent and Trademark

Art Unit: 3681

Office. Submission of the original response or a follow-up copy of the response after your response has been transmitted by facsimile will only cause further unnecessary delays in the processing of your application; duplicate responses where fees are charged to a deposit account may result in those fees being charged twice.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Roger L Pang whose telephone number is 703-305-0445. The examiner can normally be reached on 5:30am to 4:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Charles Marmor can be reached on 703-308-0830. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
